ANALYTIC SUBJECT INDEX

Anharmonicity (see *Structural phase transition*) **145A** (1987) 262
Argon (see *Thermal conductivity*) **145A** (1987) 461
Argon–krypton mixture
– Diffusion and thermal diffusion in binary mixtures of methane with noble gases and of argon with krypton - Dunlop and Bignell **145A** (1987) 584

Bi-Hamiltonian structure (see *Nonlinear integrable systems*) **145A** (1987) 67
Binary mixtures
– Diffusion and thermal diffusion in—of methane with noble gases and of argon with krypton - Dunlop and Bignell **145A** (1987) 584
Boltzmann equation (see *Lorentz gas*) **145A** (1987) 220
Boltzmann equation (see *Lorentz gas*) **145A** (1987) 239
Boundary-value problem (see *Two-dimensional Z_N lattice gauge models*) **145A** (1987) 96
Brownian motion (see *Langevin equation*) **145A** (1987) 1

Carbon dioxide (see *Thermal conductivity*) **145A** (1987) 461
Carleman embedding (see *Classical dynamical systems*) **145A** (1987) 408
Casimir effect
– Casimir energy at finite temperature - Plunien et al. **145A** (1987) 202
Chaos (see *Hamiltonian system, time-dependent*) **145A** (1987) 341
Charged hard rods
– Statistical mechanics of a one-component fluid of—in 1D - Vericat and Blum **145A** (1987) 190
Classical dynamical systems
– Hilbert space description of—I - Kowalski **145A** (1987) 408
Cluster size distribution
– Solutions of Smoluchowski's coagulation equation at large cluster sizes - van Dongen **145A** (1987) 15
Clusters, large
– Solutions of Smoluchowski's coagulation equation at large cluster sizes - van Dongen **145A** (1987) 15
Coagulation (see *Smoluchowski's equation*) **145A** (1987) 15
Coherent states (see *Classical dynamical systems*) **145A** (1987) 408
Continued fraction representation (see *Lorentz gas*) **145A** (1987) 220
Correlation function (see *Ising model, random-field*) **145A** (1987) 305
Correlation functions (see *Multi-component ionic mixture*) **145A** (1987) 533
Correlation functions (see *One-component plasma*) **145A** (1987) 190
Cross correlations (see *Photon statistics*) **145A** (1987) 290
Crystalline structure (see *One-component plasma*) **145A** (1987) 190

Density waves, periodic (see *Supercooled liquid, stability of*) **145A** (1987) 273
Diffusion coefficients
– A comparison of two sets of—for hydrogen–noble gas systems - Dunlop **145A** (1987) 597
Diffusion (see *Binary mixtures*) **145A** (1987) 584
Distribution function (see *Lorentz gas*) **145A** (1987) 220
Distribution function (see *Lorentz gas*) **145A** (1987) 239
Distribution function (see *Photon statistics*) **145A** (1987) 290
Dynamical systems
– From—to the Langevin equation - Beck and Roepstorff **145A** (1987) 1

Enskog equation, revised
– Extended thermodynamics of fluids versus the revised Enskog equation - Banach **145A** (1987) 105
Exactly soluble model (see *Structural phase transition*) **145A** (1987) 262
Extended thermodynamics
– —of fluids versus the revised Enskog equation - Banach **145A** (1987) 105

Ferromagnetic phase (see *Heisenberg–Ising model, quantum spin-one*) **145A** (1987) 139
Finite size effects (see *Two-dimensional Z_N lattice gauge models*) **145A** (1987) 96
Fluctuating magnetic fields (see *Spin systems, dilute*) **145A** (1987) 498
Fluctuation formulae (see *Multi-component ionic mixture*) **145A** (1987) 557
Free energy (see *Casimir effect*) **145A** (1987) 202
Freezing
– Stability of a supercooled liquid to periodic density waves and dynamics of— - Bagchi **145A** (1987) 273

Hamiltonian system, time-dependent
– Perturbation theory analysis of chaos. II. Chaos in a time-dependent Hamiltonian system - Shimizu **145A** (1987) 341
Harmonic chains, random
– Lifshitz singularities in the total and the wavenumber-dependent spectral density of random harmonic chains - Nieuwenhuizen and Luck **145A** (1987) 161
Heisenberg $\pm$ J model, quantum
– Numerical renormalization study of the quantum Heisenberg $\pm$ J model - Sannemo **145A** (1987) 255
Heisenberg–Ising model, quantum spin-one
– Spin-glass and ferromagnetic phases of a quantum spin-one random-bond Heisenberg–Ising model with single-ion anisotropy - Buzano **145A** (1987) 139
Hierarchies (see *Nonlinear integrable systems*) **145A** (1987) 67
Hilbert space description (see *Classical dynamical systems*) **145A** (1987) 408
Hydrogen–noble gas system (see *Diffusion coefficients*) **145A** (1987) 597

Interface structure (see *Triezenberg–Zwanzig formula*) **145A** (1987) 327
Ising model, random-field
– An iterative method of the solution of the random-field Ising model with bimodal random-field distribution - Šamaj **145A** (1987) 305

Kirkwood–Smoluchowski equation
– Pair-correlation function of a fluid undergoing a simple shear flow: solution of the— - Koo and Hess **145A** (1987) 361
Korteweg–de Vries equation (see *Nonlinear integrable systems*) **145A** (1987) 67

Langevin equation
– From dynamical systems to the— - Beck and Roepstorff **145A** (1987) 1
Lifshitz singularities
– —in the total and the wavenumber-dependent spectral density of random harmonic chains - Nieuwenhuizen and Luck **145A** (1987) 161
Long-time stochastic behavior (see *Langevin equation*) **145A** (1987) 1
Lorentz gas
– The continued fraction representation of the evolution matrix for the—with planar symmetry in k-space - Paszkiewicz **145A** (1987) 220
– The explicit time-dependence of moments of the distribution function for the—with planar symmetry in k-space - Jasiukiewicz and Paszkiewicz **145A** (1987) 239
Lower critical dimensionality (see *Ising model, random-field*) **145A** (1987) 305

Methane–noble gas mixture
– Diffusion and thermal diffusion in binary mixtures of methane with noble gases and of argon with krypton - Dunlop and Bignell **145A** (1987) 584

Multi-component ionic mixture
– Equilibrium properties of a—. I. Sum rules for correlation functions - Suttorp and van Wonderen **145A** (1987) 533
– Equilibrium properties of a—. II. Fluctuation formulae - van Wonderen and Suttorp **145A** (1987) 557

N-level (N – 1)-mode system (see *Photon statistics*) **145A** (1987) 290
Nitrous oxide (see *Thermal conductivity*) **145A** (1987) 461
Nonlinear integrable systems
– New hierarchies of nonlinear completely integrable systems related to a change of variables for evolution parameters - Fuchsteiner and Oevel **145A** (1987) 67

One-component plasma
– Statistical mechanics of a one-component fluid of charged hard rods in 1D - Vericat and Blum **145A** (1987) 190
One-dimensional maps
– Period doubling in maps with a maximum of order z - van der Weele et al. **145A** (1987) 425

Pair-correlation function of fluid
– Pair-correlation function of a fluid undergoing a simple shear flow: solution of the Kirkwood–Smoluchowski equation - Koo and Hess **145A** (1987) 361
Parallel plates, conducting (see *Casimir effect*) **145A** (1987) 202
Period doubling (see *One-dimensional maps*) **145A** (1987) 425
Photon statistics
– —in an N-level $(N-1)$-mode system - Kozierowski and Shumovsky **145A** (1987) 290

Quasiperiodicity–chaos transition (see *Hamiltonian system, time-dependent*) **145A** (1987) 341

Random-field distribution, bimodal (see *Ising model, random-field*) **145A** (1987) 305
Recursion operator (see *Nonlinear integrable systems*) **145A** (1987) 67
Renormalization (see *Heisenberg ± J model, quantum*) **145A** (1987) 255

Scaling functions (see *One-dimensional maps*) **145A** (1987) 425
Shear-flow-induced distortion (see *Pair-correlation function of fluid*) **145A** (1987) 361
Smoluchowski's equation
– Solutions of Smoluchowski's coagulation equation at large cluster sizes - van Dongen **145A** (1987) 15
Solidification
– Stability of a supercooled liquid to periodic density waves and dynamics of freezing - Bagchi **145A** (1987) 273
Spectral density (see *Harmonic chains, random*) **145A** (1987) 161
Spin-glass phase (see *Heisenberg ± J model, quantum*) **145A** (1987) 255
Spin-glass phase (see *Heisenberg–Ising model, quantum spin-one*) **145A** (1987) 139
Spin-one quantum random-bond models
– Spin-glass and ferromagnetic phases of a quantum spin-one random-bond Heisenberg–Ising model with single-ion anisotropy - Buzano **145A** (1987) 139
Spin systems, dilute
– Dynamics of dilute spin systems in random fluctuating magnetic fields - Chechetkin and Lutovinov **145A** (1987) 498
Stochastic evolution (see *Spin systems, dilute*) **145A** (1987) 498
Structural phase transition
– Exactly soluble model for—with a Gaussian type anharmonicity - Stamenković et al. **145A** (1987) 262
Sum rules (see *Multi-component ionic mixture*) **145A** (1987) 533
Sum rules (see *Multi-component ionic mixture*) **145A** (1987) 557
Supercooled liquid, stability of
– Stability of a supercooled liquid to periodic density waves and dynamics of freezing - Bagchi **145A** (1987) 273
Surface tension (see *Triezenberg–Zwanzig formula*) **145A** (1987) 327

Thermal conductivity
– The—of argon, carbon dioxide and nitrous oxide - Millat et al. **145A** (1987) 461
Thermal diffusion (see *Binary mixtures*) **145A** (1987) 584
Thermodynamical quantities (see *Multi-component ionic mixture*) **145A** (1987) 557
Transient hot-wire technique (see *Thermal conductivity*) **145A** (1987) 461
Triezenberg–Zwanzig formula
– Interfacial tension, the Triezenberg–Zwinzig–Yvon equation, and the intrinsic structure of an interface - Ciach et al. **145A** (1987) 327
Two-dimensional Z_N lattice gauge models
– Finite size effects with 2-D Z_N lattice gauge models - Gibbs et al. **145A** (1987) 96
